ISBN-13:978-3-540-19664-8 e-ISBN-13:978-1-4471-1842-8
DOI: 10.1007/978-1-4471-1842-8

British Library Cataloguing in Publication Data
Past, present, parallel. a survey of available parallel computing systems.
1. Multiprocessors
I. Trew, Arthur, 1957– II. Wilson, Greg, 1963–
004.35
ISBN-13:978-3-540-19664-8

Library of Congress Cataloging-in-Publication Data
Past, present, parallel: a survey of available parallel computing systems /
Arthur Trew and Greg Wilson, editors.
p. cm. includes index.
ISBN-13:978-3-540-19664-8
1. Parallel processing (Electronic computers) 2. Parallel computers.
I. Trew, Arthur, 1957– . II. Wilson, Greg.

1 Introduction	1
1.1 An Introduction to Parallel Processing: Greg Wilson	2
1.1.1 B. P. (Before Parallelism)	2
1.1.2 Computer Architectures	6
1.1.3 Computer Software	9
1.1.4 Types of Parallelism	12
2 SIMD: Specialisation Equals Success	13
2.1 Active Memory Technology: Arthur Trew	14
2.1.1 The Company	14
2.1.2 The Machine	16
2.1.3 The Development System	20
2.1.4 Programming Languages	21
2.1.5 The Market Niche	22
2.1.6 The Competition	23
2.1.7 The Future	24
2.2 MasPar Computer Corporation: Arthur Trew	26
2.2.1 The Company	26
2.2.2 The Machine	27
2.2.3 The Program Development System	32
2.2.4 Programming Languages	32
2.2.5 The Market	33
2.2.6 The Competitors	34
2.2.7 The Future	35
2.3 Thinking Machines Corporation: Arthur Trew	36
2.3.1 The Company	36
2.3.2 The Machine	37
2.3.3 The Development System	43
2.3.4 Programming Languages	43
2.3.5 The Market Niche	45
2.3.6 The Competition	46
2.3.7 The Future	47
3 Shared Memory Multiprocessors: The Evolutionary Approach	55
3.1 Alliant Computer Systems: Malcolm Brown & Billy Taylor	56

3.1.1	The Company	56
3.1.2	The Hardware	57
3.1.3	The Visualisation Machines	59
3.1.4	Software	60
3.1.5	The Market Niche	61
3.1.6	The Competition	62
3.1.7	The Future	62
3.2	BBN Advanced Computers Inc.: Arthur Trew	64
3.2.1	The Company	64
3.2.2	The Machine	66
3.2.3	The Development System	70
3.2.4	Programming Languages	72
3.2.5	The Market Niche	73
3.2.6	The Competition	74
3.2.7	The Future	75
3.3	Concurrent Computer Corporation: Billy Taylor & Greg Wilson	76
3.3.1	Background	76
3.3.2	The 3200 Series	76
3.3.3	The 8000 Series	78
3.3.4	The Market	78
3.3.5	The Future	79
3.4	Convex Computer Corporation: Malcolm Brown & Sandy Robertson	80
3.4.1	The Company	80
3.4.2	The Hardware	81
3.4.3	Software	83
3.4.4	The Market Niche	84
3.4.5	The Competition	85
3.4.6	The Future	85
3.5	Encore Computer Corporation: Arthur Trew	87
3.5.1	The Company	87
3.5.2	The Machines	89
3.5.3	The Development System	93
3.5.4	Programming Languages	93
3.5.5	The Market Niche	94
3.5.6	The Competition	95
3.5.7	The Future	96
3.6	FPS Computing: Arthur Trew	97
3.6.1	The Company	97
3.6.2	The Machine	99
3.6.3	The Development System	102
3.6.4	Programming Languages	103
3.6.5	The Market Niche	103
3.6.6	The Competition	104
3.6.7	The Future	105

3.7	Sequent Computer Systems: Sandy Robertson	106
3.7.1	The Company	106
3.7.2	The Machine	107
3.7.3	The Operating System	110
3.7.4	Programming Languages	111
3.7.5	The Market Niche	112
3.7.6	The Competition	113
3.7.7	The Future	113
4	Hypercubes: A Geometry that Works	125
4.1	Intel Scientific Computers: Rob Scott	126
4.1.1	The Company	126
4.1.2	The Hardware	127
4.1.3	The Concurrent I/O Facility	130
4.1.4	The Software	132
4.1.5	Sales	133
4.1.6	The Market Niche	134
4.1.7	The Future	136
4.2	NCUBE Corporation: Rob Scott	137
4.2.1	The Company	137
4.2.2	The Hardware	138
4.2.3	The Software	142
4.2.4	The Market Niche	143
4.2.5	The Opposition	143
4.2.6	The Future	144
5	The Transputer and Its Offspring	149
5.1	Inmos Limited: Mark Smith	150
5.1.1	The Company	150
5.1.2	The Transputer	153
5.1.3	The Software	156
5.1.4	The Market Niche	156
5.1.5	The Future	157
5.2	Caplin Cybernetics : Mark Smith	159
5.2.1	The Company	159
5.2.2	Caplin's Product Range	160
5.2.3	The Market Niche	163
5.2.4	Present Applications	163
5.2.5	The Future	164
5.3	Meiko Scientific Limited: Neil MacDonald	165
5.3.1	The Company	165
5.3.2	The Hardware	166
5.3.3	Programming Environments	172
5.3.4	CS Tools	172
5.3.5	Sales and Marketing	173
5.3.6	The Future	175

5.4 Parsys Limited: Mark Smith	176
5.4.1 The Company	176
5.4.2 The Hardware	179
5.4.3 The Software	182
5.4.4 The Market Niche	184
5.4.5 The Competition	184
5.4.6 Current Applications	185
5.4.7 The Future	186
5.5 Parsytec GmbH: Malcolm Brown	187
5.5.1 The Company	187
5.5.2 System Overview	188
5.5.3 Applications and Performance	192
5.5.4 The Software	193
5.5.5 The Market	194
5.5.6 The Future	195
6 New Machines For New Niches	201
6.1 Cogent Research Incorporated: Neil MacDonald	202
6.1.1 The Company	202
6.1.2 The Hardware	202
6.1.3 The Software	204
6.1.4 The Market Niche	205
6.1.5 The Future	206
6.2 Silicon Graphics Incorporated: Mark Smith & Matthew Hite	207
6.2.1 The Company	207
6.2.2 The Hardware	208
6.2.3 The Software	211
6.2.4 The Market Niche	213
6.2.5 The Future	214
6.3 Stardent Computer Incorporated: Mark Smith & Matthew Hite	215
6.3.1 The Company	215
6.3.2 The Hardware	219
6.3.3 The Software	221
6.3.4 The Market	222
6.3.5 The Future	223
6.4 Teradata Corporation: Greg Wilson	225
6.4.1 The Company	225
6.4.2 The Hardware	226
6.4.3 Interface Software	228
6.4.4 Internal Software	229
6.4.5 Support for Critical Environments	230
6.4.6 The Marketplace	230
6.4.7 The Future	231

7 Vector Supercomputers: It's Never too Late to Parallelise	239
7.1 Cray Research Inc.: Rob Scott	240
7.1.1 The Company	240
7.1.2 Cray X-MP → Cray Y-MP → C90	241
7.1.3 Cray-2 → Cray-3	243
7.1.4 The Software	246
7.1.5 The Market Niche	248
7.1.6 The Competition	249
7.1.7 The Future	250
7.2 NEC: Greg Wilson	252
7.2.1 The Company	252
7.2.2 The Hardware	252
7.2.3 The Software	254
7.2.4 The Market	254
7.3 Supercomputer Systems Inc: Rob Scott	256
7.3.1 The Company	256
7.3.2 Who is Steve Chen?	257
7.3.3 SSI's Options	257
8 The Giants: Biding Their Time	261
8.1 Digital Equipment Corporation: Colin Brough	262
8.1.1 The Company	262
8.1.2 The Hardware	263
8.1.3 The Software	265
8.1.4 The Market	267
8.1.5 The Future	267
8.2 Fujitsu: Greg Wilson	269
8.2.1 The Company	269
8.2.2 Vector Computers	269
8.2.3 The CAP-C5 Array Processor	272
8.2.4 The AP-1000 Array Processor	275
8.2.5 The Future	277
8.3 IBM Corporation: Arthur Trew & Mark Smith	279
8.3.1 The Company	279
8.3.2 The ES/9000	280
8.3.3 Operating Systems	283
8.3.4 Programming Languages	284
8.3.5 The Market	285
8.3.6 The Future	286
9 Software: Efficiency vs. Profitability?	291
9.1 Express: Mike Norman	292
9.1.1 The Express Family of Products	292
9.1.2 History and Philosophy	293
9.1.3 Express	293

9.1.4 Cubix and Plotix	295
9.1.5 Other Utilities	296
9.2 Helios: Malcolm Brown	297
9.2.1 Perihelion and Helios	297
9.2.2 The Helios Model	297
9.2.3 The Helios Network	298
9.2.4 Helios Programming Environment	300
9.2.5 Helios as an Environment	303
9.2.6 The Market for Helios	303
9.3 Linda: Neil MacDonald	304
9.3.1 Linda Operations	305
9.3.2 Linda Examples	306
9.3.3 The Future	307
9.4 STRAND ⁸⁸ : Mark Smith	309
9.4.1 History	309
9.4.2 Design	310
9.4.3 Markets for STRAND ⁸⁸	312
9.4.4 The Competition	314
9.4.5 The Future	315
10 Machines Past	317
10.1 BiiN: Greg Wilson	318
10.1.1 The Company	318
10.1.2 The Hardware	318
10.1.3 The Software	320
10.1.4 The Market	321
10.1.5 BiiN's Demise	321
10.2 ETA Systems: Rob Scott	323
10.2.1 The Company	323
10.2.2 The Hardware	324
10.2.3 The Software	325
10.2.4 Costs and Sales	326
10.2.5 What Went Wrong?	327
10.3 Multiflow: Neil MacDonald	330
10.3.1 Going Up	330
10.3.2 Going Down	332
10.3.3 Why Did Multiflow Fail?	332
10.3.4 A Future for VLIW Technology?	333
10.4 Myrias Research Corporation: Greg Wilson	335
10.4.1 The Company	335
10.4.2 User-Level Model	335
10.4.3 Claims About the User-Level Model	337
10.4.4 Compromises in the User-Level Model	338
10.4.5 The Virtual Machine and Its Implementation	338
10.4.6 The Product Range	339
10.4.7 Sales	341

10.4.8 The End	341
10.5 Symult Incorporated: Malcolm Brown	342
10.5.1 Ametek and Symult	342
10.5.2 The Symult S2010	342
10.5.3 The Communications Network	343
10.5.4 Why did the S2010 Fail?	345
11 Machines Future	353
Bibliography	357
Appendices:	
A Technology	359
A.1 Cache Memory: Sandy Robertson	360
A.1.1 Performance	360
A.1.2 Cache Update Policies	360
A.1.3 Multicache Consistency	361
A.2 Message Passing Systems: Mike Norman	361
A.2.1 Addressing of Messages	362
A.2.2 Deadlock and Related Issues	364
A.2.3 Controlling Message Transfer	364
A.2.4 Delivering Messages	365
A.2.5 Message Selection	366
A.2.6 Placing Tasks	366
A.3 Visualisation: Matthew White & Greg Wilson	367
A.3.1 Doing It In Hardware	367
A.4 Parallel Compilers: Neil MacDonald & Colin Brough	368
A.4.1 Vectorising Compilers	369
A.4.2 Parallelising Compilers	370
B Units	373
C Glossary	375
D Trademarks	383
Index	387

List of Tables

1.1 Flynn's Taxonomy	6
2.1 Sales of DAP's by Area and by Type	22
2.2 Major Interest Areas of DAP Purchasers	23
2.3 Sales of MP-1s by Centre	34
3.1 Sales of the TC2000 by Centre	74
3.2 The Markets for Convex Machines	85
3.3 Sales of the Model 500EA by Centre and Geography ..	104
3.4 Major Interest Areas of Model 500EA Purchasers	105
4.1 Sales of Intel Computers by Model	134
5.1 The QT range of Caplin Products	160
5.2 Overview of Meiko In-Sun Computing Surfaces	169
5.3 Meiko Sales by Market Sector	174
5.4 Comparison between a Cyber 205 and a Parsytec Model 64 Super-Cluster	193
6.1 Analysis of SGI Software	213
6.2 Comparison of SGI and Stardent for a £75,000 System	214
7.1 Sales of Cray Computers by Model	249
8.1 DEC SMP Machines	264
8.2 Vax 9000 Vector Performance	265
8.3 VP2000 Applications	272
8.4 IBM ES/9000 Models	282
8.5 LINPACK Benchmarks on Multiprocessor IBM 3090 .	282
10.1 The Trace/200 Series	330

List of Figures

1.1 Different Routes to Higher Performance	5
1.2 0-D to 5-D Hypercubes	9
2.1 The DAP PE Interconnection Strategy	17
2.2 A Schematic Diagram of the DAP Hardware	19
2.3 A Schematic Diagram of the X-Net Mesh Interconnect .	30
2.4 A Schematic Diagram of the CM-2 Hardware	39
3.1 The Architecture of the Alliant FX/2800	58
3.2 A Two-Column Butterfly Switch	67
3.3 The Architecture of the Convex C240	82
3.4 The Encore 91 02	92
3.5 The System 500 Matrix Co-Processor	101
3.6 Sequent's Multiprocessor Architecture	108
5.1 Conceptual Structure of the Transputer	154
5.2 The Inmos T800 Transputer Architecture	155
5.3 Typical HEX System Architecture	162
5.4 A Complete Compute Node for the SuperNode 1000 ...	180
5.5 The Architecture of the Model 64 SuperCluster	192
6.1 The XTM Resource Server	204
6.2 CPU Architecture of the SGI Personal Iris	209
6.3 Stellar Hardware Architecture	216
6.4 Architecture of the Stardent 3000	220
7.1 The Background Processor on the Cray-2	244
7.2 NEC's SX-3 Series Vector Supercomputer	253
8.1 Fujitsu's VP2000 Series Vector Supercomputers	270
8.2 A Schematic Diagram of the IBM ES/9000	283
9.1 The Client-Server Model in Linda	307
9.2 The Task Farm in Linda	308
10.1 The Symult S2010 Router	344
A.1 A Typical Graphics Pipeline	368
